Family Medicine Physicians provide expectant mothers a comprehensive blend of what a Midwife or an Obstetrician offer. A Mosaic Family Physician considers the mother's vision of her labor and delivery, makes it as "natural" as desired, and combines this with the reassurance that a Family Medicine Physician is trained to handle unexpected outcomes.

- Complete prenatal care for mom and baby through entire pregnancy and postpartum period
- Your doctor will deliver your baby
- Comprehensive breastfeeding support and triage for common breastfeeding issues
- Care for your baby and family after delivery
- Evening appointments
- Team-centered care available with physicians, nurses, health educator and case manager
- Trained and prepared for neonatal and OB emergencies if needed
- Physicians can address health issues not just pregnancy-related at appointments
